PIANO WITH PERSONALITY

Matt Hodge

MATT HODGE

Hi, I'm Matt! I'm truly passionate about helping you find your **"piano personality"** (no matter your age or experience level).

Who am I? Here's a quick rundown. I'm an award-winning professional pianist, composer, music professor, published music author, frequent judge for international music competitions, and global artist who's worked with thousands of clients and students spanning 30+ countries across six continents.

My music has been heard/performed in award-winning films, international television, streaming services (including *Netflix*, *Hulu*, *Apple*, *PBS*), radio, podcasts, professional theatre, video games, and viral videos from various creators that total over 75 million views.

I've had the honor of working with music hall of fame legends, as well as *Grammy*, *Tony*, *Emmy*, *Golden Globe*, and *Academy Award* winners and nominees...but my favorite people to work with are my students!

My students have gone on to perform on Broadway, national tours, studio albums, cruise ships, and in movies, t.v., and with companies such as Disney and Universal.

I hope this comprehensive PDF guide introduces you to important music concepts that help simplify your journey as a piano player! Let's dive in...

Table of Contents

04 Piano Notes

How to find notes on a piano.

05 Notes On Clefs

How piano sheet music notates clefs.

06 Major Scales

All of the major scales played on piano.

09 Major Key Signatures

All of the major key signatures.

10 Minor Scales

All of the minor scales played on piano.

13 Minor Key Signatures

All of the minor key signatures.

14 How To Find Minor Scales

Minor scales in relation to major scales.

16 Chords In Each Key Signature

Playing, identifying, and labeling chords in every key signature (plus Circle of 5ths)

28 Level Up Your Chords

Transform your chords and level them up!

36 Piano Rhythms

Practice rhythm patterns at all levels.

48 Repeat Signs

Explore various repeat symbols in music.

50 Song Breakdown

Breakdown new songs you're learning.

PIANO NOTES

Here are the notes on a piano.

The black keys on a piano alternate between sets of “two” and sets of “three”. This pattern lets you use black keys to find notes on the piano quickly until you’ve memorized the location of all the notes.

For example:

- “C” is always the white key right to the left of a set of two black keys
- “A” is always the white key in between the 2nd and 3rd black key in a set of three black keys.

As you can see above, all music notes are named after only the first seven letters of the English alphabet: **A B C D E F G**. These seven letters just get constantly looped up and down the piano.

For beginner piano students, the two most important notes to be able to find are “**A**” and “**C**”.

- **A** is important to find because you can then count up or down to any other note you need to find using the alphabet.
- **C** is important to find because “C Major” is the easiest scale for piano students to start out learning (since it uses only white keys).

NOTES ON CLEFS

Piano sheet music is written on two clefs: **Treble Clef** and **Bass Clef**.

The **Treble Clef** looks like a large cursive wave, and the **Bass Clef** looks like a backwards C with two dots.

Typically, the right hand plays **Treble Clef** and the left hand plays **Bass Clef**.

Clefs are drawn using **5 lines** and **4 spaces** (where notes are drawn). There are simple phrases to remember the lines and spaces for each clef (going from bottom to top)...

TREBLE CLEF

E G B D F

F A C E

LINES: Every Good Boy Does Fine

SPACES: F A C E (spells the word “face”)

BASS CLEF

G B D F A

A C E G

LINES: Good Boys Do Fine Always

SPACES: All Cows Eat Grass

HOW TO FIND MINOR SCALES

Minor scales share the same notes and key signatures as major scales!

Minor scales start on the **sixth** note of a major scale.

This means that if you choose a major scale and play its notes --- but start on the sixth note of its scale --- you'll play the **minor scale** that shares its key signature (*this technically is called the "relative minor" – meaning the minor scale that shares the same key as the major scale*).

Let's take the "**C major**" scale as an example...

The notes of the C major scale are:

C D E F G A B C

The sixth note on this scale is **A**.

So if you play the notes of the **C major scale**, but start and end on **A** (*instead of starting and ending on C*), you'd play these notes:

A B C D E F G A

This is the "**A Minor**" scale.

You can apply this same logic to all the **major scales** to find all the **minor scales**!

Learn more at matthodgemusic.com

MINOR SCALES DISTINCTIONS

“Natural Minor” vs. “Harmonic Minor”

Even though there is only one type of major scale, there are actually multiple types of minor scales. The two most popular types are called **natural minor** and **harmonic minor**.

The minor scales that the previous pages outlined are the **natural minor** scales (*which is the type of minor scale that piano students start off learning*).

To turn a **natural minor** scale into a **harmonic minor** scale, you simply **raise the 7th note** (*meaning a harmonic minor scale is a natural minor scale except for having a raised 7th*).

For example:

The **A natural minor scale** is the following notes:

A - B - C - D - E - F - G - A

To convert this into the **A harmonic minor scale**, you would raise the seventh note (*which means you'd raise G to G#*).

Therefore, the **A harmonic minor** scale is the following notes:

A - B - C - D - E - F - G# - A

CHORDS IN EACH KEY SIGNATURE

How To Play And Identify Chords

In music, **chords** are built out of **key signatures** and their corresponding **scales**. Chords can be identified in two prominent ways: their **name** and their **number**.

Chord **names** follow the same structure: the note followed by the chord type. For example: “C Major”, “Eb Minor”, “F Diminished”.

Chord **numbers** refer to where the root note lies on the key signature’s scale. For example:

- The “C major chord” is the “1” chord in the C major key signature because C is the first note of the C major scale.
- However, the “C major” is the “5” chord in the F major key signature because C is the fifth note of the F major scale.

Chord numbers are also represented by **Roman numerals**. An uppercase Roman numeral means the chord is **major**; a lowercase Roman numeral means the chord is **minor**; a lowercase Roman numeral with a small circle means the chord is **diminished**.

So, for example: a “**D minor chord**” in **C major key signature** would be called the “**2**” chord or notated as **ii** (since it’s a minor chord built on the 2nd note of a C major scale).

Every major and minor scale is built on the same formula pattern of chords (*the “1” chord in every major key is always a major chord, the “2” chord in every major key is always a minor chord, etc.*).

Here are the chord patterns within all major scales/key signatures:

I ii iii IV V vi vii^o

Here are the chord patterns within all minor scales/key signatures:

i ii^o III iv v VI VII

Learn more at matthodgemusic.com

Why Is This Important?

It is important to learn how to play chords and identify chords.

All too often, beginner piano players merely learn the notes that build chords (**chord names**), but they don't pay attention to the function and purpose of the chords (**chord numbers**).

Learning how to identify what a chord is in relation to the key signature it is being used within will drastically increase your abilities to...

- **Learn** music more quickly
- Confidently **improvise** melodies and harmonies
- Quickly **transpose** music to different key signatures

The next six pages outline all of the chords found within every key signature (major keys and minor keys).

Each column represents a key signature and displays every chord found in that major key signature (*i.e., which chord is built on each note of that key signature's scale*).

Key signatures that are **enharmonics** --- meaning different names but the same piano keys (*such as C# and Db, F# and Gb*) --- are grouped together in rows.

***Remember that for minor key signatures, you start on the sixth note of the major scale, and then that tells you the minor scale. So that's how you'll turn each Major scale into a Minor scale (play the same notes and chords of a major scale, but start and end on the 6th note of the major scale).*

Let's dive into the world of music chords!

CHORDS IN MAJOR KEYS

Below are the chords in all **major** key signatures. Notice all major keys follow the same “chord numbers” pattern...

1, 4, 5 are major chords

2, 3, 6 are minor chords

7 is a diminished chord

Major Keys	I (1 major)	ii (2 minor)	iii (3 minor)	IV (4 major)	V (5 major)	Vi (6 minor)	Vii ^o (7 diminished)
C	C	Dm	Em	F	G	Am	Bdim
C#	C#	D#m	E#m	F#	G#	A#m	B#dim
Db	Db	Ebm	Fm	Gb	Ab	Bbm	Cdim
D	D	Em	F#m	G	A	Bm	C#dim
Eb	Eb	Fm	Gm	Ab	Bb	Cm	Ddim
E	E	F#m	G#m	A	B	C#m	D#dim
F	F	Gm	Am	Bb	C	Dm	Edim
F#	F#	G#m	A#m	B	C#	D#m	E#dim
Gb	Gb	Abm	Bbm	Cb	Db	Ebm	Fdim
G	G	Am	Bm	C	D	Em	F#dim
Ab	Ab	Bbm	Cm	Db	Eb	Fm	Gdim
A	A	Bm	C#m	D	E	F#m	G#dim
Bb	Bb	Cm	Dm	Eb	F	Gm	Adim
B	B	C#m	D#m	E	F#	G#m	A#dim
Cb	Cb	Dbm	Ebm	Fb	Gb	Abm	Bbdim

CHORDS IN MINOR KEYS

Below are the chords in all **minor** key signatures. Notice all minor keys follow the same “chord numbers” pattern...

1, 4, 5 are minor chords

3, 6, 7 are major chords

2 is a diminished chord

Minor Keys	i (1 minor)	ii ^o (2 diminished)	III (3 major)	iv (4 minor)	v (5 minor)	VI (6 major)	VII (7 major)
C	Cm	Ddim	Eb	Fm	Gm	Ab	Bb
C#	C#m	D#dim	E	F#m	G#m	A	B
D	Dm	Edim	F	Gm	Am	Bb	C
D#	D#m	E#dim	F#	G#m	A#m	B	C#
Eb	Ebm	Fdim	Gb	Abm	Bbm	Cb	Db
E	Em	F#dim	G	Am	Bm	C	D
F	Fm	Gdim	Ab	Bbm	Cm	Db	Eb
F#	F#m	G#dim	A	Bm	C#m	D	E
G	Gm	Adim	Bb	Cm	Dm	Eb	F
G#	G#m	A#dim	B	C#m	D#m	E	F#
Ab	Abm	Bbdim	Cb	Dbm	Ebm	Fb	Gb
A	Am	Bdim	C	Dm	Em	F	G
A#	A#m	B#dim	C#	D#m	E#m	F#	G#
Bb	Bbm	Cdim	Db	Ebm	Fm	Gb	Ab
B	Bm	C#dim	D	Em	F#m	G	A

CHORD PROGRESSIONS

Use the charts on the previous two pages to practice chord progressions! Here are some popular chord progressions to get you started (along with a few song examples for each progression). These incredibly popular chord progressions below are from **major** key signatures...

PROGRESSION: I - vi - IV - V (1-6-4-5)

SONG EXAMPLES: *Heart & Soul, Blue Moon, Stand By Me, Unchained Melody, Duke of Earl, Stay, I Will Always Love You, One Fine Day, Earth Angel, Beyond the Sea, Every Breath You Take, Crocodile Rock, Lollipop, Baby I Need Your Lovin', Teenager in Love, This is Me, Please Mr Postman, How Great Is Our God*

PROGRESSION: I - V - vi - IV (1-5-6-4)

SONG EXAMPLES: *Let It Be, Don't Stop Believing, Someone Like You, She Will Be Loved, Wagon Wheel, Take Me Home Country Roads, Hey Soul Sister, Take On Me, Let It Go, How Far I'll Go, Where Is The Love, Forever Young, Can You Feel The Love Tonight, Wherever You Will Go, I'm Yours, Wrecking Ball, Man in the Mirror, Right Here Waiting, Torn, You're Beautiful, Auld Lang Syne*

PROGRESSION: vi - IV - I - V (6-4-1-5)

SONG EXAMPLES: *Africa, Hello, It's My Life, Wake Me Up, May It Be, All of Me, Zombie, Alone, Stronger, Grenade, If I Were A Boy, We Found Love, Our God Is An Awesome God, Poker Face, Complicated, Behind These Hazel Eyes, What About Us, Whenever Wherever*

TRY THESE OTHER MAJOR KEY PROGRESSIONS!

V - vi - IV - I (5-6-4-1)

I - vi - ii - V (1-6-2-5)

I - iii - vi - IV (1-3-6-4)

vi - I - V - IV (6-1-5-4)

AND TRY THESE MINOR KEY PROGRESSIONS!

i - VI - iv - V (1-6-4-5)

i - VI - III - VII (1-6-3-7)

i - VII - VI - v (1-7-6-5)

iv - VI - VII - i (4-6-7-1)

CIRCLE OF FIFTHS

The **Circle of Fifths** is a famous music theory structure that helps organize key signatures, scales, and chords. The chart below is the Circle of Fifths.

Instead of trying to explain this complex system in writing, I recorded a video that simplifies the Circle of Fifths in an honest discussion. Please click the link below to watch...

CIRCLE OF FIFTHS VIDEO: <https://youtu.be/7JgY3LhUeEQ>

LEVEL UP YOUR PIANO CHORDS

Are you ready to level up your piano chords?!

Then the following charts will be game changers for you!

In the following pages, I outline the exact notes you can add to level up two of the most prominent chords you'll play as a piano player:

MAJOR CHORDS and **MINOR CHORDS**

Let's dive in!

First off, here is a helpful reminder of the piano keyboard (just in case you may need the visual aid).

In the following charts, I outline how you can level up your major and minor chords in three different ways. These ways are referred to as the following:

- ***Adding the “2nd”***
- ***Adding the “6th”***
- ***Adding the “7th”***

Up first is the chart that gives you the exact notes of how to level up the most popular **major** chords in the above three ways (helping to add a beautiful shimmer to the sound)!

Followed by that is the chart that gives you the exact notes of how to level up the most popular **minor** chords in the above three ways (helping to add a darker tension to the sound)!

Although each chart lists the notes in order that they are located on the piano, you can visually see that some seem easier than others. So, if you are at a beginner level, start with chords on the charts that contain less sharps and flats.

READY TO LEVEL-UP YOUR CHORDS? DIVE ON INTO THE CHARTS!

“LEVEL UP” MAJOR CHORDS

This chart shows the most popular major chords that are played on the piano and three different “level up” notes that add beautiful depth and shimmer to their sound!

CHORD	PRIMARY NOTES (“1”, “3” & “5”)	LEVEL UP NOTE (add the “2nd”)	LEVEL UP NOTE (add the “6th”)	LEVEL UP NOTE (add the “7th”)**
C MAJOR	C-E-G	C-D-E-G	C-E-G-A	C-E-G-B
C# MAJOR	C#-E#-G#	C#-D#-E#-G#	C#-E#-G#-A#	C#-E#-G#-B#
Db MAJOR	Db-F-Ab	Db-Eb-F-Ab	Db-F-Ab-Bb	Db-F-Ab-C
D MAJOR	D-F#-A	D-E-F#-A	D-F#-A-B	D-F#-A-C#
Eb MAJOR	Eb-G-Bb	Eb-F-G-Bb	Eb-G-Bb-C	Eb-G-Bb-D
E MAJOR	E-G#-B	E-F#-G#-B	E-G#-B-C#	E-G#-B-D#
F MAJOR	F-A-C	F-G-A-C	F-A-C-D	F-A-C-E
F# MAJOR	F#-A#-C#	F#-G#-A#-C#	F#-A#-C#-D#	F#-A#-C#-E#
Gb MAJOR	Gb-Bb-Db	Gb-Ab-Bb-Db	Gb-Bb-Db-Eb	Gb-Bb-Db-F
G MAJOR	G-B-D	G-A-B-D	G-B-D-E	G-B-D-F#
Ab MAJOR	Ab-C-Eb	Ab-Bb-C-Eb	Ab-C-Eb-F	Ab-C-Eb-G
A MAJOR	A-C#-E	A-B-C#-E	A-C#-E-F#	A-C#-E-G#
Bb MAJOR	Bb-D-F	Bb-C-D-F	Bb-D-F-G	Bb-D-F-A
B MAJOR	B-D#-F#	B-C#-D#-F#	B-D#-F#-G#	B-D#-F#-A#

Paired grey rows mean that the two chords are the same piano key but called different names (*for example “F#” and “Gb” are the same piano black key, but can be called two names*).

If you are at a beginner level, start with the chords that have less sharps and flats.

****In this context, adding the “7th” means we’re adding what is technically known as the “major 7th” (meaning the “7th” is in the key signature of the major chord). I point this out because adding the “7th” can also refer to adding a flat 7th – which is known as a “dominant 7th” (which is done a lot in jazz and rock music).**

If you want to turn the 7th chords from “Major 7” (as the chart shows) to a “dominant 7”, simply flat the 7th note listed in the chart. So for example, C-E-G-B is the “C Major 7” chord; C-E-G-Bb is the “C Dominant 7” chord (or simply “C7”).

“LEVEL UP” MINOR CHORDS

This chart shows the most popular minor chords that are played on the piano and three different “level up” notes that add beautiful depth and tension to their sound!

CHORD	PRIMARY NOTES (“1”, “3” & “5”)	LEVEL UP NOTE (add the “2nd”)	LEVEL UP NOTE (add the “6th”)	LEVEL UP NOTE (add the “7th”)
C MINOR	C-Eb-G	C-D-Eb-G	C-Eb-G- Ab	C-Eb-G- Bb
C# MINOR	C#-E-G#	C#- D# -E-G#	C#-E-G#- A	C#-E-G#- B
D MINOR	D-F-A	D-E-F-A	D-F-A- Bb	D-F-A- C
Eb MINOR	Eb-Gb-Bb	Eb-F-Gb-Bb	Eb-Gb-Bb- Cb	Eb-Gb-Bb- Db
E MINOR	E-G-B	E- F# -G-B	E-G-B- C	E-G-B- D
F MINOR	F-Ab-C	F- G -Ab-C	F-Ab-C- Db	F-Ab-C- Eb
F# MINOR	F#-A-C#	F#- G# -A-C#	F#-A-C#- D	F#-A-C#- E
G MINOR	G-Bb-D	G- A -Bb-D	G-Bb-D- Eb	G-Bb-D- F
Ab MINOR	Ab-Cb-Eb	Ab- Bb -Cb-Eb	Ab-Cb-Eb- Fb	Ab-Cb-Eb- Gb
A MINOR	A-C-E	A- B -C-E	A-C-E- F	A-C-E- G
Bb MINOR	Bb-Db-F	Bb- C -Db-F	Bb-Db-F- Gb	Bb-Db-F- Ab
B MINOR	B-D-F#	B- C# -D-F#	B-D-F#- G	B-D-F#- A

MINOR vs. MAJOR

Minor chords are different from major chords. Adding the “level up” extra notes to Major chords heightens the beautiful shimmer of the ‘bright’ sound of Major chords. In contrast, adding “level up” extra notes to minor chords heightens the tension of the ‘dark’ sound of minor chords.

If you are at a beginner level, start with chords that have less sharps and flats.

DISCLAIMER As stated above, this chart does not list every single possible minor chord that exists, but it outlines the most popular minor chords that are played on the piano.

**** In this context, adding the “7th” means adding what is technically known as the “minor 7th” (meaning the “7th” is in the key signature of the minor chord). I point this out because adding the “7th” can also refer to adding a major 7th (as seen on the previous page).**

Now let's look at all of the most popular types of chords in terms of how they're constructed and what their symbols look like in sheet music (especially lead sheets).

The chart below outlines how each type of chord is built, so you can practice how to construct any chord.

PRO TIP: Start with a major chord, and then alter it to create your desired chord (notice how the “Scale Degrees” column shows you how to alter a major chord in order to create new chords).

*For example: if I want to build **F diminished**, I take an F major chord (which is **F A C**) and then flat the 3rd and 5th (which becomes **F Ab Cb**).*

How To Work Out The Notes Of Any Chord Symbol

Chord Type	Chord Symbol Options (C used as an example)	Scale Degrees (compared to the major scale of the chord root)	Number of semitones between each chord note
MAJOR TRIAD	C	1 3 5	R 4 3
MINOR TRIAD	Cm C- Cmin	1 b3 5	R 3 4
DIMINISHED TRIAD	C° Cdim	1 b3 b5	R 3 3
MAJOR 7	CΔ Cmaj7	1 3 5 7	R 4 3 4
(DOMINANT) 7	C7	1 3 5 b7	R 4 3 3
MINOR 7	Cm7 C-7 Cmin7	1 b3 5 b7	R 3 4 3
MINOR 7 b5 (1/2 DIM)	Cm7b5 Cø	1 b3 b5 b7	R 3 3 4
MINOR/MAJOR	CmΔ C-Δ Cm ♯7	1 b3 5 7	R 3 4 4
DIMINISHED	C°7 Cdim7	1 b3 b5 6	R 3 3 3
6	C6	1 3 5 6	R 4 3 2
MINOR 6	Cm6 C-6 Cmin6	1 b3 5 6	R 3 4 2

******The word “**semitones**” in the far right column means counting steps (or piano keys). “**R**” means “**Root**” (*the first note of the chord*). Then the numbers represent how many piano keys you count up (*not counting the note you start on*).

This chart depicts what the various chord symbols look like in sheet music (including lead sheets).

CHORD SYMBOL CHART

C Major C, CM, Cmaj	C Minor Cm, Cmi, Cmin, C-	C Diminished Cdim, C°	C Augmented Caug, C+

CHORD INVERSIONS

A chord inversion happens when you rearrange the same notes so a different note ends up on the bottom. It's still the same chord — same letters, same sound — just a different shape. Learning inversions helps your hands move smoothly between chords instead of jumping around the keyboard.

TRIADS HAVE 3 POSITIONS

A triad (3-note chord) like C major (C–E–G) can be arranged three different ways. Whichever note lands on the bottom tells you the inversion:

 ROOT POSITION C – E – G	 1ST INVERSION E – G – C	 2ND INVERSION G – C – E
--	--	--

INVERSION	BOTTOM NOTE	C MAJOR EXAMPLE
Root Position	Root (C)	C – E – G
1st Inversion	3rd (E)	E – G – C
2nd Inversion	5th (G)	G – C – E

TIP: The letters never change — a C major chord is always C, E, and G. Only the order (and which note is lowest) changes between inversions.

4-NOTE CHORD INVERSIONS

Add one more note to a triad — like a 7th — and you get a four-note chord with one more possible inversion: **4 positions** instead of 3.

CMAJ7 HAS 4 POSITIONS

ROOT POSITION
C-E-G-B

1ST INVERSION
E-G-B-C

2ND INVERSION
G-B-C-E

3RD INVERSION
B-C-E-G

INVERSION	BOTTOM NOTE	CMAJ7 EXAMPLE
Root Position	Root (C)	C-E-G-B
1st Inversion	3rd (E)	E-G-B-C
2nd Inversion	5th (G)	G-B-C-E
3rd Inversion	7th (B)	B-C-E-G

THE PATTERN CONTINUES

This rule scales infinitely: a chord with a certain number of notes has that same number of possible positions (1 root position, plus one inversion for every note above the root). A triad (3 notes) = 3 positions. A 7th chord (4 notes) = 4 positions. A 9th chord (5 notes) would have 5 positions, and so on.

TIP: No matter how many notes are in a chord, the rule is the same — whichever note is on the bottom tells you the inversion. Each new inversion just moves the bottom note up an octave to become the new top note.

PIANO RHYTHMS

Below are a series of piano rhythm exercises that you can try at all levels of beginner, intermediate, and advanced.

BEGINNER LEVEL

For beginner level, try each rhythm example at a *slow* tempo and choose basic chords (major and minor chords)

Right Hand -- full chord

Left Hand -- chord root note (one single note or in octaves) So for example: a C major chord in right hand and a C in the left hand

INTERMEDIATE LEVEL

For intermediate level, try each rhythm example at a *slow to medium fast* tempo and choose *slightly more complex* chords (major and minor chords with added notes such as added 2, added 6, and 7th chords).

Right Hand -- full chord

Left Hand -- 'open chord' (1-5-8 of the chord; so for example: C-G-C if it's a C major chord)

ADVANCED LEVEL

For advanced level, try each rhythm example at a *medium fast to fast* tempo (speed) and choose *multiple chords* per rhythm example (for example, a new chord every two beats or a new chord on every beat)

Right Hand -- full chord

Left Hand -- 'open chord' (1-5-8 of the chord; so for example: C-G-C if it's a C major chord)

RHYTHM EXAMPLE #1

BEAT COUNT	1	2	3	4
Right Hand	X	X	X	X
Left Hand	X			

RHYTHM EXAMPLE #2

BEAT COUNT	1	2	3	4
Right Hand	X	X	X	X
Left Hand	X			X

RHYTHM EXAMPLE #3

BEAT COUNT	1	2	3	4
Right Hand		X		X
Left Hand	X		X	X

RHYTHM EXAMPLE #4

BEAT COUNT	1	2	3	4
Right Hand		X		X
Left Hand	X	X	X	X

RHYTHM EXAMPLE #5

BEAT COUNT	1	2	3
Right Hand	X	X	X
Left Hand	X		

RHYTHM EXAMPLE #6

BEAT COUNT	1	2	3
Right Hand	X	X	X
Left Hand	X		X

RHYTHM EXAMPLE #7

BEAT COUNT	1	2	3
Right Hand		X	
Left Hand	X		X

RHYTHM EXAMPLE #8

+ is a subdivision; you can speak it as the word "and" ("one and two and three and four and")

BEAT COUNT	1	+	2	+	3	+	4	+
Right Hand			X				X	X
Left Hand	X				X	X		

RHYTHM EXAMPLE #9

BEAT COUNT	1	+	2	+	3	+	4	+
Right Hand			X				X	X
Left Hand	X	X			X	X		

RHYTHM EXAMPLE #10

BEAT COUNT	1	+	2	+	3	+	4	+
Right Hand			X				X	
Left Hand	X	X			X	X		X

RHYTHM EXAMPLE #11

BEAT COUNT	1	+	2	+	3	+	4	+
Right Hand			X				X	
Left Hand	X	X		X	X	X		X

RHYTHM EXAMPLE #12

BEAT COUNT	1	+	2	+	3	+	4	+
Right Hand			X				X	
Left Hand	X			X	X			X

RHYTHM EXAMPLE #13

BEAT COUNT	1	2	3	4	5	6
Right Hand	X	X	X	X	X	X
Left Hand	X			X		

RHYTHM EXAMPLE #14

BEAT COUNT	1	2	3	4	5	6
Right Hand		X	X		X	X
Left Hand	X			X		

RHYTHM EXAMPLE #15

BEAT COUNT	1	2	3	4	5	6
Right Hand	X	X	X	X	X	X
Left Hand	X		X	X		X

READING RHYTHM

Rhythm is the heartbeat of music— it tells you **when** to play and **how long** to hold each sound.

Every note and rest you see on the page has a specific duration, measured in beats. Once you can read rhythm, you can play almost anything that's put in front of you.

NOTE VALUES

In 4/4 time (the most common time signature), a whole note lasts **4 beats**. Every other note value is a fraction of that whole note — cut it in half, and you get a half note; cut it in half again, and you get a quarter note, and so on.

The diagram shows a musical staff in 4/4 time with five measures. The first measure contains a whole note. The second measure contains a half note. The third measure contains a quarter note. The fourth measure contains an eighth note. The fifth measure contains a sixteenth note. Below each note, its name and duration are listed.

WHOLE NOTE	HALF NOTE	QUARTER NOTE	EIGHTH NOTE	SIXTEENTH NOTE
= 4 beats	= 2 beats	= 1 beat	= ½ beat	= ¼ beat

SPLITTING THE BEAT

This chart shows how one whole note divides evenly into smaller and smaller pieces — the same 4 beats, just sliced up differently.

1 WHOLE NOTE = 4 BEATS							
HALF NOTE				HALF NOTE			
QUARTER		QUARTER		QUARTER		QUARTER	
8th	8th	8th	8th	8th	8th	8th	8th

RESTS

Rests tell you **when not to play**. Every rest lasts exactly as long as its matching note value — the only difference is silence instead of sound. Reading rests well is just as important as reading notes.

REST VALUES

WHOLE REST	HALF REST	QUARTER REST	EIGHTH REST	SIXTEENTH REST
				
= 4 beats	= 2 beats	= 1 beat	= ½ beat	= ¼ beat

NOTES VS. RESTS

Every note has a rest “twin” that holds the exact same number of beats:

NAME	NOTE	REST	BEATS
Whole			4
Half			2
Quarter			1
Eighth			½
Sixteenth			¼

TIP: Count every rest in your head, just like you count notes. Silence has rhythm too!

TIME SIGNATURES

The time signature sits at the very beginning of a piece of music, right after the clef. It tells you how to count the beats in every measure.

ANATOMY OF A TIME SIGNATURE

TOP NUMBER — how many beats are in each measure.

BOTTOM NUMBER — which note value gets one beat (4 = a quarter note).

COMMON TIME SIGNATURES

4/4 — “Common Time”

The most popular time signature in music. 4 quarter-note beats per measure.

3/4

3 quarter-note beats per measure. Common in waltzes.

2/4

2 quarter-note beats per measure. Common in marches.

TIP: When you sit down at the piano, always check the time signature first — it tells you how to count before you play a single note.

COUNTING BEATS

Counting out loud (or in your head) while you play is the fastest way to build strong rhythm skills. Here's how counting works for the note values you just learned.

COUNTING QUARTER NOTES

Each quarter note gets one beat. Count “1, 2, 3, 4” evenly, one number per note.

COUNTING EIGHTH NOTES

+ is a subdivision; you can speak it as the word “and” (“one and two and three and four and”). Each pair of eighth notes shares one beat — count “1 + 2 + 3 + 4 +.”

COUNTING MIXED RHYTHMS

Real music mixes note values together. Above: a quarter note (“1”), two eighth notes (“2 +”), and a half note (“3”, held through beat 4) fill one measure of 4/4.

RHYTHM QUICK REFERENCE

CHEAT SHEET

NAME	NOTE	REST	BEATS
Whole			4
Half			2
Quarter			1
Eighth			$\frac{1}{2}$
Sixteenth			$\frac{1}{4}$

COUNTING PRACTICE

Clap or tap each rhythm below while counting out loud. Stay silent on the rests — but keep counting!

PRACTICE MEASURE #1

Count “1 – 2 – 3 – 4,” but stay silent on beat 3.

PRACTICE MEASURE #2

Count “1 + 2 + 3 + 4 +,” but stay silent on beats 2 and 4.

PRACTICE MEASURE #3

Count “1 – 2 – 3 – 4.” The half note rings through beat 3 — just keep counting while it holds.

BEYOND 4/4

4/4 is the most common time signature, but it's far from the only one. Once you know what the top and bottom numbers mean, you can count in almost any time signature you come across.

A QUICK REVIEW

The **top number** tells you how many beats are in each measure. The **bottom number** tells you which note value gets one beat. So far, you've only seen a 4 on the bottom — but it can be other numbers too.

WHAT CAN THE BOTTOM NUMBER BE?

BOTTOM NUMBER	NOTE THAT GETS 1 BEAT	ICON
2	Half Note	
4	Quarter Note — the one you know best	
8	Eighth Note	

2/2 — “Cut Time”

The half note gets the beat, so 2 half notes fill each measure. Common in marches and fast pieces.

SIMPLE VS. COMPOUND TIME

Time signatures fall into two families, based on how each beat splits apart:

Simple time — each beat divides into 2 smaller parts. (4/4, 3/4, 2/4 — everything you've learned so far.)

Compound time — each beat divides into 3 smaller parts. (6/8, 9/8, 12/8 — new territory!)

TIME SIGNATURE	FAMILY	BIG BEATS / MEASURE
4/4	SIMPLE	4
3/4	SIMPLE	3
6/8	COMPOUND	2
9/8	COMPOUND	3
12/8	COMPOUND	4

TIP: If the bottom number is 8 *and* the top number is 6, 9, or 12, you're in compound time — turn the page to learn how that changes your counting.

COUNTING IN 6/8

6/8 is the most common compound time signature — you'll hear it in ballads, lullabies and plenty, of pop songs. Here's how it works.

SIX EIGHTH NOTES PER MEASURE

On paper, 6/8 has 6 eighth notes per measure. You can count every one of them evenly: “1, 2, 3, 4, 5, 6.”

BUT IT FEELS LIKE 2 BIG BEATS

In practice, musicians rarely count all 6. Instead, they feel 6/8 as **2 big beats**, each made up of 3 eighth notes (a dotted quarter note).

6/8 = 2 BIG BEATS	
BIG BEAT 1 (1 2 3)	BIG BEAT 2 (4 5 6)

6/8 VS. 3/4 — SAME NOTES, DIFFERENT FEEL

3/4 and 6/8 can look almost identical — both can be written as six eighth notes — but they group and feel completely different.

3/4 — Simple Time

Threegroupsof2. Feels like: *ONE*-and, *TWO*-and, *THREE*-and.

6/8 — Compound Time

Twogroupsof3. Feels like: *ONE*-two-three, *TWO*-two-three.

TIP: Look at how the eighth notes are beamed together — groups of 2 mean simple time, groups of 3 mean compound time.

REPEAT SIGNS

Repeat signs let a composer write a section once but have you play it more than once. They keep sheet music shorter and easier to read — once you know what they mean, you'll never be confused about where to go next.

SIMPLE REPEATS

The two dots plus a thick barline mark the start and end of a repeated section. Play from the start-repeat sign to the end-repeat sign, then jump back to the start-repeat sign and play that section one more time. If there's no start-repeat sign printed, go all the way back to the very beginning of the piece.

REPEAT ENDINGS (1ST & 2ND ENDINGS)

Sometimes the ending of a repeated section changes the second time through. The bracket marked “1” is only played the *first* time. On the repeat, skip the “1” bracket entirely and jump straight to the bracket marked “2.”

PLAYBACK ORDER

TIP: Notice the 1st ending is never played twice — once you repeat, you skip right over it and go straight to the 2nd ending.

D.C., D.S. & THE CODA

Beyond simple repeats, composers use Italian terms and symbols to send you to entirely different spots in the music. Here are the ones you'll see most often.

KEY SYMBOLS & TERMS

TERM	SYMBOL	MEANING
Segno		"The Sign" — marks a specific spot in the music you can jump back to.
Coda		"The Tail" — marks the start of a separate section that finishes the piece.
Fine		Italian for "the end" — marks where the music actually stops when repeating from the beginning.

D.C. AL CODA (DA CAPO AL CODA)

Da Capo is Italian for "from the head" (the beginning). **D.C. al Coda** tells you: go back to the very beginning of the piece, play through again, and when you reach the ⊕ (To Coda) symbol this time, skip ahead to the section marked CODA and finish there.

1ST TIME THROUGH

2ND TIME THROUGH (AFTER D.C.)

D.S. AL CODA (DAL SEGNO AL CODA)

Dal Segno is Italian for "from the sign." **D.S. al Coda** works just like D.C. al Coda, except instead of going back to the very beginning, you jump back to the %-shaped **Segno** sign.

1ST TIME THROUGH

2ND TIME THROUGH (AFTER D.S.)

TIP: D.C. always means "go back to the beginning." D.S. always means "go back to the Segno sign." Both use the coda symbol the same way — as your signal to skip ahead and finish.

REPEATS EXAMPLE

Matt Hodge

"Repeat" Example

Two staves of music in 4/4 time. The first staff contains a melody with notes G4, A4, B4, A4, G4, F4, E4, D4, C4, B3, A3, G3. Chords C, G, Am, F, C, G are written above the notes. The second staff continues the melody with notes G3, F3, E3, D3, C3, B2, A2, G2. Chords C, G, Am, F, G, C are written above the notes. The piece ends with a double bar line and repeat dots.

"Repeat Endings" & "D.S. al Coda" Examples

Two staves of music. The first staff is identical to the first staff of the previous section. The second staff continues the melody with notes G3, F3, E3, D3, C3, B2, A2, G2. Chords C, G, Am, F, G, C are written above the notes. A first ending bracket spans the last three measures (F, G, C). The piece ends with a double bar line and repeat dots.

A single staff of music. The melody continues with notes G3, F3, E3, D3, C3, B2, A2, G2. Chords C, G, Am, F, C, G are written above the notes. A second ending bracket spans the last three measures (F, C, G). The piece ends with a double bar line and repeat dots.

A single staff of music. The melody continues with notes G3, F3, E3, D3, C3, B2, A2, G2. Chords C, G, Am, F, G, C are written above the notes. The piece ends with a double bar line and repeat dots. A Coda symbol (⌘) is placed at the beginning of the staff.

A single staff of music. The melody continues with notes G3, F3, E3, D3, C3, B2, A2, G2. Chords C, G, Am, F, C, G are written above the notes. The piece ends with a double bar line and repeat dots. The text "D.S. al Coda" is written above the final measure.

A single staff of music. The melody continues with notes G3, F3, E3, D3, C3, B2, A2, G2. Chords F, C are written above the notes. The piece ends with a double bar line and repeat dots. A Coda symbol (⌘) is placed at the beginning of the staff.

"D.C. al Coda" Example

Two staves of music in treble clef. The first staff contains the notes C, G, Am, F, C, and To Coda G. The second staff contains the notes F, D.C. al Coda, F, and C. A double bar line with a coda symbol (a circle with a cross) is placed between the two staves.

"D.C. al Fine" Example

Two staves of music in treble clef. The first staff contains the notes C, G, Am, F, C, and G. The second staff contains the notes C, G, Am, F, C, and G. The first staff ends with a double bar line and the word "Fine". The second staff ends with a double bar line and the text "D.C. al Fine".

"D.S. al Fine" Example

Two staves of music in treble clef. The first staff contains the notes C, G, Am, F, C, and G. The second staff contains the notes C, G, Am, F, G, and C. The first staff ends with a double bar line and the word "Fine". The second staff ends with a double bar line and the text "D.S. al Fine".

SONG BREAKDOWN

Before you dive into learning a new song, take a few minutes to break it down. Understanding how a piece works will help you learn it faster and play it more musically. Fill this out for every new song you start! ***Print out as many copies of this page as you need!*

SONG TITLE

COMPOSER / ARTIST

DATE STARTED

TIME SIGNATURE

How many beats per measure, and what note gets the beat? (e.g. 4/4, 3/4, 6/8)

KEY SIGNATURE

What key is it in? How many sharps or flats? (e.g. C Major, G Major, A Minor)

TEMPO (SPEED)

Slow ballad? Moderate? Fast & energetic? Check for a tempo marking or BPM (Beats Per Minute).

DYNAMICS (VOLUME)

Soft throughout? Builds to loud? Look for dynamic markings like p, mf, f, crescendo/decrescendo

RHYTHM / GROOVE

What does the rhythm of the song feel like? (e.g. bouncy, swing, steady/straight, driving, laid-back, syncopated, jazzy, etc.)

EMOTION / MOOD

What feeling does this song capture? (e.g. joyful, mysterious, tender, triumphant, nostalgic, tense, etc.)

IMPORTANT CHORDS

List the main chords you'll need, plus any tricky ones worth practicing on their own.

ADDITIONAL NOTES

Trouble spots to loop, fingering reminders, sections to practice hands separately, etc.
